EXPERIENCE

Oct 2025

Internship project - Employee evaluation and performance tracking application (SatisfApp)

Role: API Developer & Back-Office Developer (Laravel / Livewire)

Technologies: Laravel, Livewire, TailwindCSS, MySQL, REST API

Developed a full REST API for a mobile application used by employees to submit evaluation data and performance scores. Built the entire back-office interface using Laravel Livewire and TailwindCSS, enabling HR teams to manage employees, analyze performance metrics, visualize real-time dashboards, and generate structured evaluation reports.

May 2025

Client project - Flight simulation and revenue tracking application

Role: API Developer (Laravel)

Technologies: Laravel, MySQL, REST API

Design and development of a Laravel REST API for a client in the aviation sector, enabling flight simulation, automatic pairing of round trips, calculation of passenger costs by class, and generation of detailed revenue reports. Focused on developing the API endpoints, implementing business logic, ensuring secure and efficient data handling, and collaborating closely with the frontend team to integrate features.

March 2025

Personal project - Hotel room booking application

Role: API Developer (Laravel)

Technologies: Laravel, MySQL, REST API

Design and development of a REST API for a hotel booking web application, enabling management of users, rooms, and bookings, with database integration and collaboration with the frontend team. Focused on designing and implementing the API endpoints, handling business logic, and ensuring secure and efficient data processing.

August 2024

Academic project - Water and electricity bill management application

Role: Full-Stack Developer (Laravel / Blade)

Technologies: Laravel, Blade, MySQL

Development of a web application for managing water and electricity bill payments, using the Laravel framework with the Blade template engine and MySQL database. Responsible for both backend and frontend development, including database integration, user management, and interface design.

EDUCATION

Ecole Nationale
d'Informatique

2023 - Present

Professional training in general computer science

Third-year student in General Computer Science

Gasy Tech

2022 - 2023

Professional training in web development

Training focused on the fundamentals of web development, where I learned essential languages such as HTML, CSS, JavaScript, and PHP, as well as best practices for website design.

Lycée Philibert
Tsiranana

2021 - 2022

High school diploma

Scientific Baccalaureate (S series), with a "Fairly Good" distinction

COMPETENCES

Laravel
